Basic Linux DevOps	Product Management
Source Code Management (git)	Cloud infrastructure
HTML / CSS / javascript	Service Oriented Architecture (SOA)

Experience

Portfolio Manager & Business Transformation Consultant

Government Digital Service (Cabinet Office, UK Government)

June 2015 - Present

Through close engagement with finance, people, and delivery teams combined with strong technical ability I added significant operational agility to the business; enabling senior leadership to make informed, data-driven decisions around prioritisation, investment, delivery, risk, financial

performance, headcount and benefits realisation to effectively manage a **£500m complex change portfolio (£150m+ in 16/17)** driving **digital transformation** across the UK government.

- Replaced complex, inflexible vendor ERP solution with bespoke BI platform
- **Saved £100k+** while improving accuracy, engagement, and user satisfaction
- Reduced reporting cycles from quarterly to monthly
- Trained Del Ops team on tools, concepts, and techniques to ensure lasting change
- Streamlined business planning to make it light-weight, continuous, and real-time
- Introduced impact-mapping and Objectives and Key Results (OKRs)
- Created bespoke OKR tracking tool
(<https://github.com/peterkappus/panoflex>) using **Ruby on Rails**

Programme Delivery Manager | Agile Coach

Government Digital Service (Cabinet Office, HM Government)

November 2014 - June 2015

Responsible for delivering the Digital Marketplace (<https://www.digitalmarketplace.service.gov.uk/>), a revolutionary programme (comprising an online platform, legal & commercial frameworks, and customer support) transforming how the government buys digital. G-Cloud sales (<https://www.gov.uk/performance/g-cloud>) alone circa £1.4B as of July 2016.

Coached teams in **agile methodologies**, business planning and reporting: resource management, road-mapping, benefits realisation, risk mitigation, stakeholder management. Oversaw a **~£3M annual budget** for a 30+ person cross-functional team (spanning product design, user research, technology, procurement, engagement, support, legal, and analytics).

Active participant in the Agile delivery community at GDS providing coaching, training, and mentoring.

Pivotal Tracker, Java (Grails), Python (Flask), Jenkins, SQL Alchemy, git, Postgres, AWS Elastic Beanstalk, continuous integration (CI) with Jenkins, infrastructure automation with Ansible, AWS Relational Data Store (RDS). All code open sourced via github
(<https://github.com/alphagov/?utf8=%E2%9C%93&query=digitalmarketplace>).

Delivery Manager | Agile Transformation Coach

Pearson PLC

July 2013 - November 2014

Transformed two critical, at-risk programmes from dysfunctional waterfall delivery methods to a high-functioning, lean/agile ones using Scrum, Lean, Kanban, BDD, etc. improving efficacy, efficiency, and quality ensuring timely accurate delivery, with high rates of customer and executive satisfaction.

- Complete redesign and rebuild of the Pearson Qualifications (<https://qualifications.pearson.com>) website (a £300M+ annual business with 60K+ pages and documents) from MS SharePoint to Adobe Experience Manager (AEM)
- A real-time analytics platform to predict subscription renewal rates and identify high-risk clients of their e-learning platforms.

Mentored senior stakeholders in lean/agile methodologies supporting wider digital transformation of the world's largest publishing company.

Jira, Adobe CQ (Java), Solr, AngularJS, Apache, Jenkins, Cucumber (Ruby, Capybara, Poltergeist, PhantomJS), MySQL, CouchDB, MongoDB, Python/Flask, SOA/RESTful APIs

Scrum Master | Agile Coach

ustwo™

Nov 2012 - May 2013
